## PROJECTS

**E-commerce website for local vendors  
(#KarigarKiDuniya)** — *Full Stack Development*

Built an e-commerce site using Web dev and ML for the local vendors, tribals, sellers belonging to the economically underdeveloped parts of India where they can sell their products and earn revenue.

**Slideshow Maker (Algorithms and Data Structures)** — *Full Stack Development*

Developed a full stack website that used the Longest Common Subsequence algorithm to create a fascinating slideshow from the pictures entered by the user.

**'SarvaJan Hitay'** — *Front-End development*

Developed a front-end (website) for an organization which works on catering unemployment in the present Covid-19 scenario, providing healthcare to people in the current situation, and free online education to students in various fields.

**'नौकरी शाला'** — *Full Stack development (Ongoing)*

Developed a website that not only helps in catering unemployment but also allows the job candidates to have a hassle free job finding process. Utilized web scraping to collect the information and also built ML based recommendation system models to provide easier options to the users.

## INTERNSHIP AND EXPERIENCE

**Deutsche Bank** — *Analyst Intern (Upcoming)*

**Microsoft Learn Student Ambassador**

**REWFA e-commerce pvt.ltd** — *Front-End developer*
